 AB Surfactant systems for use in liq. detergents contain .gtoreq.50%  
 anionic surfactants contg. .gtoreq.20% alkylbenzenesulfonate as well  
 as .gtoreq.2% alkoxyated nonionic surfactant having HLB value <12  
 and sufficient water to provide a nonseparating, pourable,  
 spherulitic or G-phase compn. The systems are used with  
 water and surfactant-desolubilizing electrolyte to provide  
 non-sedimenting spherulitic compns. for use as low-foaming  
 laundry detergents or detergents for laundering at low temps. An  
 aq. detergent contg. Na C10-14 alkylbenzenesulfonate 5.0,  
 ethoxylated (3 mol) C12-15 alcs. 2.0, mono- and di-C16-18-alkyl  
 phosphate 0.8, C16-18 alcs. 0.8, Na5P3O10 30.0, optical brightener  
 0.15, CM-cellulose 0.1, and Na ethylenediaminetetrakis(methylenephos  
 phonate) 0.5% produced little foam and gave good detergency in the  
 washing of natural and synthetic fibers.
